

AM24

Audio Baby Monitor

Backlit LCD display

Room temperature monitoring

Two-Way Talk

Up to 1,000ft range¹

((())) Crystal clear sound

Hear every peep. Never miss a sound so you know when your baby is awake, and control the volume from the parent unit.

Hear every peep

The Motorola AM24 is an Audio Monitor that uses DECT technology to keep you connected to your baby, without interfering with your Wi-Fi frequency. Roam around the house without losing connection, with up to 1,000ft (300m) range, and receive alerts when you're out-of-range or the battery is low. Speak to and hear your baby with two-way talk. Never miss a peep with the high sensitivity microphone, so you know when your baby is awake, and control the volume levels from the parent unit.

GENERAL FEATURES

DECT wireless connectivity

Backlit LCD display

Up to 1,000ft (300m) range

High sensitivity microphone

Volume control

Rechargeable parent unit

Out-of-range and low battery alerts

Two-way communication

Secure and private connection

- (1) When there is a clear line of sight between parent and baby units. Any obstruction between parent and baby units will reduce the range significantly. With parent and baby units indoors, the typical range is up to 165 feet.
