ESD Refuse Sacks

TECHNICAL DATASHEET

DESCRIPTION

Our ESD refuse sacks are suitable for holding waste in an EPA and cleanroom. When used in conjunction with our range of conductive bins provide a comprehensive ESD safe solution to waste disposal in the ESD protected area.

Specifically designed for the particular needs of the electronics industry. The special additives used do not effect the film clarity or quality, and it is therefore most economical in use, as the standard film thickness can be selected.

FEATURES

- Our ESD refuse sacks are made of antistatic polyethylene
- Sterilised variations are double bagged and sterilised by gamma irradiation
- Available in blue, pink, green, yellow, clear or black from stock
- Homogeneous, non-amine antistatic polythene film which is effective at low relative humidities (less than 12%).
