

Aeronaut

High Performance Cooling Solutions – Made in Germany

Aeronaut thermal compound is the ideal entry-level product with good effectiveness and a very good price-performance ratio. One area of application for Aeronaut is, for example, air-cooled processors with a low TDP in watts (Intel Core i3/i5, AMD Ryzen 3/5) or similar systems. Another advantage of Aeronaut is its very high long-term stability, even at high temperatures. At the same time, Aeronaut is gentle on the surfaces of the CPU and cooler, so that hardly any micro-scratches occur during application and removal.
