SMFD0603 Series Surface Mount Fuses Devices

SMFD0603 Series Surface Mount Fuses Devices

Description

Polytronics SMFD0603 series surface mount slow-blow fuse utilizes thick film process with extremely stable fusing element. The glass over coating can tolerate higher temperature profile, and the non-flammable ceramic substrate offers better heat conductivity and safety. SMFD0603 series is also RoHS compliant and halogen-free to meet global environmental standard.

Features

- Slow blow
- Compact size
- Thick film manufacturing method
- Ceramic substrate with silver fusing element
- Excellent environmental integrity

Application

- Battery pack
- Digital camera
- Game equipment
- Wireless base station
- Wearable devices
- PC related equipment / peripherals
- LCD monitors and modules
- Medical device

Storage

- The ambient temperature recommended for storage shall be between 5°C ~30°C.
- The relative humidity recommended for storage shall be between 25%RH~60%RH.
- The products shall not be stored in areas where harmful gases containing sulfur or chlorine are present.

Warning

- Fuse product is not recommended for any type of coating. Polytronics is not responsible for any damage directly or indirectly related to the coating.
- For copper layer thickness or copper trace width different from the standard test board, fusing characteristics needs to be verified to ensure product performance meet user requirement.
