

Magnet Photo Paper

Note: Only one sheet of magnetic photo paper can be inserted for printing at a time

1.Print: Load **1 piece** of the Magnetic Photo Paper into your printer with the photo paper side (white glossy side) facing down.

2.Design: Use the app to create your desired design.

3.Drying: After printing, lay the paper flat and allow it to rest for 2-3 minutes to ensure the ink dries completely. Avoid touching the surface right away to prevent smudging.

4.Cutting (Optional): Trim along the edges of your design using scissors or a paper cutter.

5.Attaching: Place the cut Magnetic Photo Paper directly onto any clean, dry magnetic-friendly surface (such as a refrigerator, whiteboard, or filing cabinet).

Important Precautions

- This product uses a flexible, low-intensity magnetic sheet, suitable for displaying lightweight photos or papers.
- NOT intended for holding heavy objects.

Usage & Storage:

Do Not Bend: The product is relatively thick and rigid. Bending will cause the magnetic layer to crack and the surface coating to peel off, resulting in permanent damage.

Keep Away from Strong Magnets: Store away from strong magnetic fields to prevent loss of magnetism.

Handle Wet Ink with Care: Ensure the ink is fully dry before handling or using to avoid scratching or smudging the glossy surface.

Magnetic Strength: Flexible, low-intensity magnet
