GREATE. MARTEN REPELLENT 12V

MARTEN REPELLENT WITH 12V CONNECTION

The greate. Marten deterrent is connected directly to the car battery and gives martens no more opportunity to stay near the vehicle. The outgoing frequency and the integrated interval circuit keep the unwanted visitors away. With its direct connection to the car battery, no separate battery operation is required, allowing flexibility in placement.

PRODUCT HIGHLIGHTS

- The marten repellent emits sound frequencies every 15 seconds that are unpleasant for martens - Keeps martens away from cables and hoses in the engine compartment - The ultrasonic sounds are barely audible to humans and pets.
- Operated via 12V connection to the car battery.
- The marten repellent switches on automatically when parked and pauses automatically while driving.
- The marten repellent can remain permanently connected in the car - LED status indicator shows whether the marten repellent is switched on.
- Delivery includes 1x marten repellent with 30 cm cable & 12V connection for car battery, 3x cable ties.
