PowerCube | Extended USB |

Two graduates of industrial product design from Delft (the Netherlands) noticed the frustrations many people have with one of the world's most common products: the extension cord. It is never within reach or outlets are blocked because of bulky plugs. They thought this could be improved so that extension cords should not be hidden out of sight. Allocacoc introduces you the PowerCube

**NEDERLANDS**

- \* 4 extra stopcontacten (max. 2500Watt)
