#### HOW TO OPERATE

1. Before first use, please open the battery compartment as the diagram shown, take off the insulating film then cover the battery compartment.

2. Single click the switch to turn on, the flashlight outputs at the high brightness level. Click it again, every click on the switch, the brightness level will decreased in sequence until off.

**NOTE:** Under the wave operation mode, the wave feature is unavailable within 1 second after manual switch operation.

**BATTERY INSTALLATION**  
When replacing the batteries, open the cover of the battery compartment and remove the used batteries. The “+” sign in the battery compartment will glow red indicating the installation direction of the batteries. Insert the batteries as indicated into the battery compartment and then close the cover.

**NOTE:** Under the wave operation mode, the wave feature is unavailable within 1 second after manual switch operation.

**NOTE:** When the flashlight is on, quickly double click the switch, the output turn to red light.

4. When the flashlight is in red light mode, single click the switch, the red light blinks, two times per second. Click again to turn the flashlight off.

5. When turned off in the red light mode, still maintain red light output when turned on again, quickly double click turn to white light.

The headlamp contains two led colors and two operation modes including switch operation mode, and wave operation mode.

**Switch operation mode**  
When replacing the batteries, the switch operation mode is activated as the default setting. Press the switch to turn the light on or off, change the brightness leveled color, and switch to the alternative operation mode.

2. Under the switch operation mode, single click the switch to turn off the light. The light will output on the high mode and its brightness level will reduce to low mode if it turns off by each click. Quickly double click the switch to cycle the output between the white and red lights.

3. There are two output modes with the red LEDs. Single click the switch to enable the two red indicator LEDs on flash mode which turns them on every two seconds. Single click the switch again to shut the light off. The light re-lights in the red light mode as before when it is turned on again.

**Change operation mode**  
With the light on, press and hold the switch for more than 1 second to change the operation mode. The light will flash once when the change has happened.

**Wave operation mode**  
All operations under the switch operation mode are also available in the wave operation mode. Wave operation mode is used to turn the light on or off. Wave or swipe your hand over the front of the headlamp to turn

the light on or off. Under the wave operation mode, the light will return to the last output mode (brightness level & light color) used when it turns on. If there is no operation for 10 minutes after the light is turned off by wave operation, the light will automatically be totally switched off for safety purposes. Quickly wave or swipe your hand in front of the headlamp from one side to the other once to turn the light on or off for 10 times, the light will also be totally switched off.

**KÄYTTÖÖHJEET**  
Oletamme, että kaksisävyinen LED-valo ja kaksivalkoinen LED-valo ovat käytössä. Käytä valoja ja vähennä valon voimakkuus, kunnes valo on oikein. Vaihda valo väistämällä käytävää.

**KYKINTÖINTIÖTÖLÖ:**  
1. Pariston asentamisen jälkeen kykintöintimobiila aktivointi oletusvalossa. Kykintä pannamalla voi sytyttää tai sammuttaa valon, muuttua kirkkausasteesta tai valon väriä ja kytketessä toisen toimittajan.

**按压操作方式与感应操作方式转换**  
开机状态下，按下按键并保持1秒以上，转换为闪烁模式。每秒2次，再次单按按键，重新开机时，依然为红色光。

**NOTE:** Under the wave operation mode, the wave feature is unavailable within 1 second after manual switch operation.
