

Note:

This drive can be connected to USB 3.1 GEN 1 and USB 2.0 ports.

For optimal performance the device must be connected to a USB 3.1 GEN 1 port.

Before first use, it is recommended to save all preloaded files from the device to your computer's internal hard drive.

For Mac users it is recommended to format the device in Mac OS Extended.

QUICK INSTALL GUIDE

Store 'n' Go® Secure Portable HDD/SSD with Keypad Access

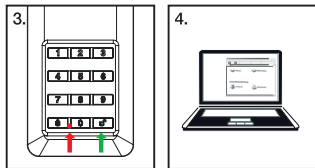

1907

1. Hardware Installation:

1. Connect the encrypted HDD / SSD to your computer.

2. Enter default passcode, then press "Unlock" button to confirm it. (Default passcode: "00000")

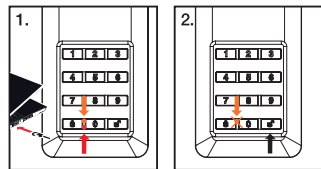

3. At this time the red LED should remain off and the green LED should be lit. The HDD / SSD has been unlocked successfully.

4. Open "My Computer" to see your external HDD / SSD is ready to use.

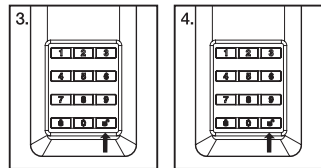

Note: For your own security we highly recommend you change the default passcode.

2. Change (Default) Passcode:

1. Press and hold "Lock" then connect the USB Cable with the drive and your computer until the red LED and orange LED light up. You now can release the "Lock" button.

2. Enter the existing passcode (Default passcode: "00000") and press "Unlock" to confirm. The orange LED will turn off.

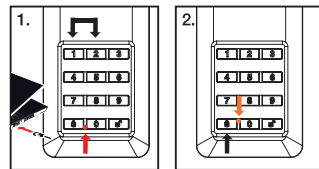

3. Type your new passcode and confirm by pressing "Unlock". The new passcode is now set.

4. To unlock your device retype your new passcode and press "Unlock".

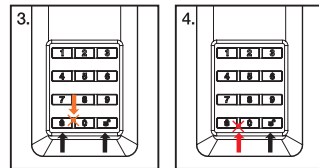

Note: Passcode must be between 5 and 12 digits long.

3. Erase Disk and set up a New Passcode:

1. Press and hold key 1 and 2 simultaneously, then connect the USB cable with the drive and your computer. Release both keys as soon as the red LED next to the Lock key lights up.

2. Now press "Lock" for 5 seconds until the orange LED lights up.

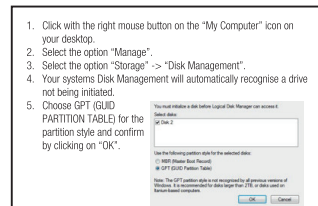

3. Type your new passcode and confirm by pressing "Lock" and retype your new passcode and press "Unlock" the orange LED will turn off.

4. Retype your new passcode and press "Unlock", the red LED turns off and is unlocked now.

Note: Please back up your data prior to setting a new passcode. For the safety of your data, setting a new passcode will initialise the drive. To format the drive please follow the steps under "Ready to use".

4. Ready to use for Windows:

Since the drive needs to be unlocked with every system start, choosing MBR is not recommended!

6. Choose the hard drive, which is now "unallocated".
7. Click with the right mouse button on the "unallocated" area and select the option "New Partition". The "New Partition Wizard" opens.
8. The installation wizard will guide you through the formatting process.
9. Tip: The presets of this installation wizard do not necessarily need to be changed. You may just want to change the drive's description and choice for a file system.
10. After the installation process has finished the drive should appear again automatically showing the assigned drive letter and name.

5. Ready to use for MAC:

1. Once your drive is connected to your Mac and unlocked, OSx will recognise the disk as unreadable.
2. Select the button "Initialise..." to start Disk Utility.
3. In Disk Utility you need to select the specific external disk.
- Note: the Store "In" Go Secure Portable HDD/SSD with Keypad Access will lose its original type description, name and branding. We recommend disconnecting all other external volumes. Do not select any internal volumes.
4. Select the only external disk available.
5. Choose Erase from the Disk Utility tool bar to get to the formatting dialog box.
6. In the next dialog box you can assign a drive name and a file format.
7. Click on "erase" to start the formatting process.
