

smrter Hydra^{DUO}

USB-C, Lightning or Micro-USB, and everything in one! - smrter Hydra DUO - The USB cable with two ports

The smartphone is empty, the tablet too and only one free charging slot? Smrter now sends the solution into the ring! The 120cm long nylon charging cable is available for almost all current connections, whether Micro-USB, USB C or Lightning. The charging current of up to 2.4A (when charging two devices at the same time, otherwise up to 1.5A single) ensures a fast charging process and even allows the simultaneous charging of two different devices. An ideal charging cable for the whole family!

Simultaneous charging

The charging cable fits all current devices with USB-C, Lightning, or Micro-USB connection and even allows you to recharge two devices at once.

The USB port can be connected to any USB socket. No matter if USB socket adapter, 12V car charger, PC or even a Power Bank.

Robust due to aluminium and nylon

The braided nylon sheathing gives the cable the necessary stability and prevents unwanted tangling and knotting of the cable. The additional anti-kink reinforcement of the adapters makes the cable ideal for long-term use, whether at home or on the road. With the attached Velcro cable fastener, the cable can be stowed away again in no time and without tangled cables.

smrter Hydra^{DUO}

Technical details

Material	Nylon fabric / aluminium / plastic
USB port	USB 2.0
Charging current	Up to 2.4A (with 2 devices simultaneously)
Lenght	120 cm
Compatibility	Suitable for all devices with Apple Lightning, Micro-USB or USB type C connection (depending on model)
Charging multiple devices simultaneously	Yes
