

# AirJuice

Free your devices with the GC AirJuice wireless charger. Forget about traditional cables while maintaining the current charging speed. Stylish design and high-quality workmanship make AirJuice not only a great source of energy but also a decoration for any desk.

## NEXT LEVEL CHARGING

GC AirJuice provides wireless charging with a power of up to 15W, which is in no way inferior to traditional chargers. The device has FOD, foreign object detection, which informs the user about objects on the surface ensuring the safety of work. With the ability to charge with 7.5W, AirJuice works perfectly with Apple devices - iPhones, AirPods and AirPods Pro wireless earbuds.

## WIRELESS COMFORT

Using GC AirJuice is extremely easy - regardless of whether your phone has a case, the charger will detect it and start charging. The non-slip surface will ensure traction for any device placed on it. GC AirJuice is extremely quiet, making it great when placed near the bed.
