

Raspberry Rock Pi 4 zbh. SATA NAS HAT Top Board

EAN CODE

For Quad and Penta SATA HAT

To monitor the SSD/HDD's and display some basic information of the NAS, the TOP Board was designed.

It provides PWM FAN control, IP address info and other details via the implemented OLED display and a button for selecting as well as powering the device off. This button can also be assigned to custom functions on request.

A ribbon cable connects the SATA HAT with the Top board.
