C1 Wireless USB-C to HDMI Dongle (1080P) **H1** Wireless HDMI to HDMI Dongle (1080P)

The diagram illustrates the connection of a monitor and a laptop to a central unit. It is divided into three numbered steps:

- Step 1:** A monitor is connected to a central unit via a cable. The central unit has a port labeled 'H-1' and a port labeled 'C-1'.
- Step 2:** A laptop is connected to the same central unit via a cable. The central unit has a port labeled 'H-1' and a port labeled 'C-1'.
- Step 3:** The central unit is connected to a power source via a cable. The power source is represented by a battery symbol.

The diagram illustrates the connection of a monitor and a laptop to a power source. It is divided into three numbered steps:

- Step 1:** A monitor is shown on the left. To its right is a power source (a battery) connected to a monitor icon. A cable connects the power source to the monitor icon.
- Step 2:** A laptop is shown on the left. To its right is a power source (a battery) connected to a laptop icon. A cable connects the power source to the laptop icon.
- Step 3:** A monitor and a laptop are shown on the left. To their right is a power source (a battery) connected to a monitor icon and a laptop icon. A cable connects the power source to the monitor icon, and another cable connects the power source to the laptop icon. A third cable connects the monitor icon to the laptop icon.

The diagram illustrates the connection of a monitor and a laptop to a central unit. It is divided into three numbered steps:

- Step 1:** A monitor is connected to a unit labeled '8' via a cable. An arrow points to the right, indicating the next step.
- Step 2:** A laptop is connected to a unit labeled '8' via a cable. An arrow points to the right, indicating the next step.
- Step 3:** A unit labeled 'H-1' is connected to a unit labeled 'C-1' via a cable. An arrow points to the left, indicating the final step.

The diagram illustrates two ways to connect a monitor to a laptop. In the first method, an H-1 cable is used to connect the monitor's input port to the monitor port on the back of the laptop. In the second method, an H-1 cable connects the monitor to a monitor port on the back of the laptop, and a C-1 cable connects the monitor port on the back of the laptop to the monitor's input port.

H1: Desenchufe el puerto de alimentación USB del H1 de la fuente de alimentación para detener la duplicación/extensión de la pantalla y vuelva a enchufar la alimentación USB del H1 a la fuente de alimentación para reiniciar
