

EXT3L

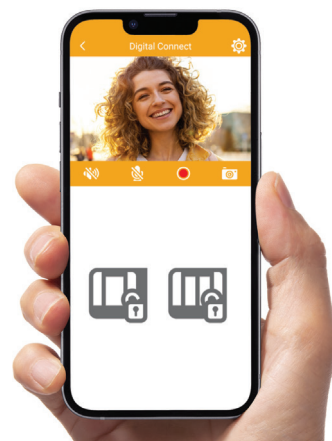

Wired smart videophone

With fingerprint reader

MAKE YOUR VISITORS FEEL WELCOME

Choose Extel's Digital Connect 7" touchscreen smart videophone for worry-free access control. Its easy installation and range of features make it modern and avant-garde. Choose how you want to manage your access: by fingerprint, by temporary QR code or via the Extel Connect application. The intercom panel is available in a range of colours* and the monitor has a neat, sleek design, making this videophone the perfect match for your home.

* Casings sold separately

WARRANTY

EASY TO INSTALL

- First, secure the intercom panel to the pillar, which will leave your hands free to wire it.
- For the monitor, an anchoring plate can be mounted to the wall, leaving your hands free to connect the cables to the monitor and then simply snap it onto the plate.
- What's more, you benefit from the Polarity Protect function, which protects your videophone against wiring errors.

MAKE YOUR ARRIVAL EASIER WITH THE FINGERPRINT READER

Stop wasting time looking for your keys in your bag or pocket: the Extel Digital Connect videophone has the solution! Thanks to its biometric technology and fingerprint reader, the intercom panel allows you to enter your home without any hassle: just pass your finger over the fingerprint reader and you're in!

You can open your gate and side gate depending on how long you hold down your finger: if you hold down your finger quickly, you open the side gate: if you hold it down for a long time, you open the gate.

What's more, you can save up to 10 fingerprints, so the whole family can enjoy it!

CONTROL YOUR ACCESS WITH COMPLETE CONFIDENCE

Digital Connect offers several ways to control access to your property:

- From the monitor, you can chat, open and close the gate or electric strike plate and use **Door Check** to check the outside of your home at any time.

- With the **Extel Connect** application, your smartphone becomes your remote monitor: you can control your gate and side gate and keep an eye on the number of entries. You are notified of any visit, with photos or videos taken by the intercom at the time of the call. You can answer and open access if you wish, even remotely via your smartphone.

- In addition to the same features as the monitor, the **Extel Connect** application allows you to generate a **QR code** for personalised access by your visitors. You can choose the dates and times during which the **QR code** is functional, as well as the type of opening, and then share it with those concerned.

CONVENIENT FEATURES

- **Digital name holder**: no more handwritten labels that fade away after a few weeks! With its **OLED screen**, the intercom panel displays the name you have defined or the action in progress on the gate (open, close).

- **Night vision**: **infrared LEDs** give you optimum vision. On the intercom panel, the name holder lights up at night and the call button remains permanently illuminated.

- Resistant, touch-sensitive intercom panel made of recycled aluminium with IP44 certification to protect it from water and dust.

A CUSTOMISABLE PRODUCT

- The front of the intercom panel can be **customised** in a choice of 3 other colours (available as accessories): graphite, titanium grey and terracotta, to match your front.

- Choice of **6 call melodies** on the monitor, or possibility of downloading **2 additional customised tunes** from the application.

PRODUCT CONTENT

- - 1 x 7" colour monitor with touch screen and WiFi connection
- 1 intercom panel
- 1 monitor wall bracket
- Screws and bolts required for mounting
