82

page:
1/1

Revision:
0

date:
10/01/2023

Dear customers,

We have upgraded MYRRA's products 74080 to 74082 Flyback transformers for switch mode power supplies which will be replaced by transformers 74087 to 74089.

The products 74080 to 74082 will be gradually stopped in production and will no longer be available to the sale. We highly recommend our customers to use the new references for their new developments to prevent shortage at 74080-74081-74082 end of life.

The new references are fully compatible with the preceding ones (same pin out and same electrical characteristics).

This evolution leads to a reduction of the surface needed on the PCB to place the component (refer to below mechanical drawings).

Former reference	Designation	New reference	Designation
74080	FLYBACK EF20 24W 12/12V	74087	FLYBACK TRANS. EF20 - 24 W - 2 X 12V
74081	FLYBACK EF20 20W 3.3/5/12V	74088	FLYBACK TRANS. EF20 - 20 W - 3.3+5+12V
74082	FLYBACK EF20 20W 5V/5V	74089	FLYBACK TRANS. 20 W - 2 X 5 V
Mechanical drawing		Mechanical drawing	
74080 - 74081 - 74082 // Drawing		74087 - 74088 - 74089 // Drawing	

NB : 74087 is certificated by the VDE for IEC-61558-2-16.

For further information, please contact our sales department.
