LogiLink® PROFESSIONAL

Multi-Function Crimping Tool

Part no.: WZ0009

Instructions:
1. Cutting-blade: Cut the modular cable to the desired length.
2. Stripping-blade: Insert the cable between two blades and squeeze the handles to remove the outer insulation of the cable.
3. Crimping modular: Put the modular plug in correct place, gold contacts of the plug under and then inset the cable into the plug. Squeeze the handles firmly to crimp the contacts and secure the cable.

Technical Features

Cutting, stripping and crimping for 8P8C/RJ-45, 6P6C/RJ-12, 6P4C/RJ-11, 4P4C and 4P2C in one tool

Durable, ad simple multi-use to make telephone terminals quick

Tool is made of high quality plastic

Easy and light operation

Product dimension 99 x 205 x 24mm

Weight 0.15kg
