UNITS, DESIGNED TO MATCH THE INTERIOR OF THE MODERN BOAT. ALSO EQUIPPED WITH THE LATEST TECHNOLOGY

**THE MARINE VERSION.** These units are basically the same as their regular version, but have some extra advantages, like a high grade protection against moisture and UV light.

The front panel is made of special UV resistant material, against discoloration by sunlight.

The housing and mounting frame of these units have a powder coating and the pcb does have an

anti moisture protection. So even that which is not visible can withstand the elements and high humidity.

## Deckless unit

• NO CD DECK •
