Ringkabelschuhe isoliert 2,5-6mm² (VS-3259221) (Conrad 646691)

PVC Insulated Ring Terminals Standard

All our connectors and terminals are electro tin plated because the soft character and corrosion durability of the tin coating result in low and stable contact resistance. Our tin coatings have a good resistance to oxidation in moderately corrosive environments.

The insulation on connectors produced by AE Industries, offers the products an excellent resistance against heat, cold and oil and an exceptional insulation performance, which make them extreme suitable for almost all industries in the present and future market.

features:

Max. electrical rating:	600 Volts
Max. operating temp:	75 °C.
Material:	Copper
Plating:	Electro tin plated
Insulation:	PVC
