

BassPro SL

Powered, 8" (200mm) car audio under seat woofer system

Big bass from a compact powered subwoofer system.

The BassPro SL powered woofer fits under the front seat of many vehicles, and adds powerful bass to any car audio system. An electronic crossover and flexible EQ adjustments let you tune the BassPro SL to your system, your car's acoustic environment and your listening preferences. The energy-efficient digital amplifier provides a powerful engine to drive the subwoofer while staying cool even when driven hard. The BassPro SL delivers great bass output without taking up a lot of space.

Features

- ▶ Proprietary, shallow-profile woofer
- ▶ Efficient Class D amplifier
- ▶ Intelligent electronic design
- ▶ System Control
- ▶ Line- and high-level inputs
- ▶ Wired, remote level control capability

BassPro SL

Powered, 8" (200mm) car audio under seat woofer system

Proprietary, shallow-profile woofer

The 8" (200mm) woofer in the BassPro SL is designed specifically to provide low distortion, great bass performance contained in our proprietary ABS enclosure, which has a remarkably compact footprint.

Efficient Class D amplifier

The amp that powers the BassPro SL produces minimal heat, and it doesn't require a lot of current from the car's electrical system.

Intelligent electronic design

The BassPro SL employs custom circuitry to protect and provide optimum performance at varying output levels without impacting performance or clarity.

System Control

An electronic crossover control provides variable adjustment from 50Hz – 120Hz allowing you to dial-in BassPro SL to best integrate with the rest of your car audio system.

Line- and high-level inputs

For added installation flexibility, the BassPro SL features both line- and high-level inputs allowing you to connect to both factory installed and aftermarket systems. If you use the high-level inputs to connect the BassPro SL to the head unit, an input load switch lets you switch from "Low" to "High" to achieve optimum results.

Wired, remote level control capability

The BassPro SL is compatible with the RBC Remote Bass Controller (sold separately), which enables you to control the level remotely.

What's in the Box

- 1 powered woofer enclosure
- 4 mounting screws
- Owner's manual

Technical Specifications

BassPro SL

- ▶ Description: Powered, under seat woofer enclosure
- ▶ Woofer: 8" (200mm)
- ▶ Amplifier Power: 125W RMS
- ▶ Frequency Response: 35Hz – 120Hz
- ▶ Fuse: 20A
- ▶ Maximum Current Draw: 12A
- ▶ Quiescent Current Draw: <800mA
- ▶ Input Sensitivity: 0.2V – 2V Line-Level Input; 2V – 20V High-Level Input
- ▶ Crossover Frequency: 50Hz – 120Hz
- ▶ Crossover Slope: 12dB/octave
- ▶ Bass Boost: 0dB to +9dB @ 70Hz
- ▶ Dimensions (L x W x H): 13-9/16" x 9-7/8" x 2-13/16" (344mm x 250mm x 71mm)
