## Spider-Repellent

Fend off spiders before they get into your house

Spiders are creeping up to you from dark corners and recesses? They may be small, harmless or even useful, but most people won't tolerate them in their homes. Even killing them can be difficult for people suffering from arachnophobia. The best solution is to prevent spiders from entering your rooms in the first place. The Gardigo Spider-Repellent is designed to keep them away using ultrasound, which is inaudible to humans, but

a nuisance to spiders. Areas outside the device's reach will appear more pleasant to them and they will prefer being there. Sleep well in a spider-free home!

Also available as a set of 2 (Art.-No. 669872).
