## Your Perfect Cycling Companion has Arrived

### ► Explore new places

Whether you're cycling through small villages in rural France, taking in the sights of a big city like Amsterdam or riding through the Swiss Alps, the Cyclo 400 puts the whole of Europe at your fingertips. With full European maps updatable for the lifetime of the device, you'll be using it for years to come.

The Cyclo 400 makes discovering new places easy. Just enter your desired destination and let Cyclo do the rest. Download a track or plot your own routes if you know the lay of the land. Whichever way, all you have to do is saddle up and go. Safe in the knowledge that the Cyclo 400 has got you covered. It works straight out of the box, giving you more time to focus on what you enjoy - cycling.

### ► Designed with you in mind

When taking a beautiful scenic ride you want to enjoy the bright sunshine and not curse it for causing a glare on your bike computer's screen. That's why the Cyclo 400 has a 4-inch, flat, anti-glare touch screen for crystal-clear reading of maps, directions and stats while you ride.

The new Cyclo user interface has been made even more intuitive. It's so user-friendly you will be up and pedalling within minutes, probably without even needing to refer to the user manual.

### ► The fun factor

If you're feeling adventurous, there's the unique 'Surprise-Me™' feature, giving you three separate routes to choose from based on time, distance or destination; the perfect way to explore a new place.

It's always fun to challenge yourself to improve your performance on a ride, especially if you're trying to get fit at the same time. The all-new lap function allows you to do this, by marking different parts of your ride or setting distance intervals. It's easily controlled using one of the three hard keys, which also allow for quick recording.

Connect to MioShare and directly sync your rides with Strava™, allowing you to analyse your rides and share with others. Strava segments and outdoor training compatible.
