Give yourself a competitive cycling edge

▶ Cycling re-invented

Whenever you get on your bicycle, it's a chance to improve. Either outdoor or indoor, track or road, reaching a personal best or competing against others; the options are endless with the Cyclo 605 HC. Everything you need to boost your performance and motivate you, all packaged in a stylish design.

▶ Explore and compete

Keep your training rides fresh by exploring new places. Re-enact legs of the Tour de France. Climb an Alpine pass. With full European maps updatable for the lifetime of the device, you can literally take your cycling to new heights. If you fancy mixing things up, use the unique 'Surprise Me™' feature to plot three different routes based on time, distance or destination.

▶ Unparalleled performance

Whether you're out racing in peak season or training indoors off-season, get the most out of any ride with the Cyclo's tracking and monitoring stats capabilities.

No more messing around with spoke magnets and the hard work of trying to fit sensors around your pedals and frame. It comes with ANT+ magnet-less speed and cadence sensors that are simple to fit. Just attach sensors to the hub of your wheel and around the saddle bar.

Included is also an ANT+ Heart Rate Monitor to achieve optimal fitness. If you're training indoors, the ANT+ (FE-C) sensors connect to compatible trainers and let you adjust and control the desired track resistance.

The WiFi connectivity allows you to sync tracks and recordings to your MioShare account without connecting to a PC. Get on screen group messages from social apps (WhatsApp, Twitter, Facebook) via built-in Bluetooth™ smartphone connectivity.

The Cyclo 605 HC excels in any weather. The 4-inch, flat, anti-glare touch screen, gives crystal-clear reading of maps, directions and stats while you ride. IPX7 Water resistant in heavy downpours.

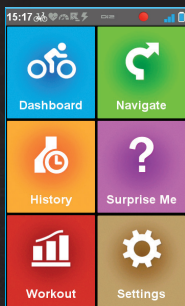

Connect to MioShare and directly sync your rides to Strava™, allowing you to analyse your rides and share with others. Strava Segments, in and outdoor training compatible.

▶ Sophisticated, yet simple

The new Cyclo user interface has been made even more intuitive. It's so user-friendly you will be up and pedalling within minutes, probably without even needing to refer to the user manual. But, you will still get all the performance data and stats you need. Simplicity with functionality, in perfect balance. It's never been easier to setup and use a high-performance cycling navigation computer. Maps are pre-installed and ready to go out of the box. Just fit the sensors, charge your device and away you go.
